

A professional service for your Investor Relations calls

NTT delivers professional, fully managed IR events, incorporating the best in project management and our Cloud Communications technology.

Digital Events for Investor Relations includes calls and webcasts.

Events are arranged according to your specific event requirements and managed by the operator, following a pre-agreed format and script. Question and answer sessions are skilfully delivered to ensure a smooth flow to the meeting. Live assistance is available to all meeting attendees and by utilising the customised welcome message you ensure that your event extends your organisation's brand identity.

Analysts can join easily – with just one phone call or web link to join. The Q&A flow is controlled, with the ability to limit the number of questions per analyst; favoured analysts can be pushed to the front of the Q&A queue and all questions via chat can be filtered. The whole Q&A process can be handled by an NTT operator via a separate chat or communications line.

After your event, we provide you with complete post-event reporting and a list of all participants.

Key business benefits

Complete, professionally managed IR call and webcast service.

Carefully controlled Q&A flow with question filtering.

Full participant list access during and after event.

Contact us

“The Cloud Communications division of NTT Ltd. helps the Investor Relations unit to reach our shareholders and stakeholders at the same time, at the lowest cost and to the largest audience. It allows access to all our shareholders and stakeholders at the same time using only one access number with video or without video. I would highly recommend NTT Ltd. services to all companies because of its quality, diversity and cost effectiveness.”

Beste Tasar, IR Director, Pegasus Airlines
