

Remote and hybrid work is here to stay

Are you investing in the right mobility tools to support your employees?

of employees are fully remote or work in a hybrid model.*

organizations say hybrid and remote working needs have led to their investing in mobility in the past two years.*

*2023 Global Employee Experience Trends Report, NTT DATA

Employees need to be able to do their work effortlessly in a range of settings, including while traveling to and from the office – especially those who consistently work in mobile environments, such as salespeople or consultants operating in different office locations.

BYOD (bring your own device) is becoming more common, and there are challenges with employees using personal mobiles.

Few employees make business calls on mobile UC apps. People are used to using their native dialers on their iPhones and Android devices – and they don't want to change.

of employees use business mobile UC apps to make calls.¹
